

## RP-1501 Contact Pulse Cleaner

The RP-1501 CPC is designed to remove oxidation from eutectic salt overheat detector center conductor contacts without disassembly.

This tool has been approved for use on all Boeing commercial aircraft overheat warning eutectic salt detectors. If the loop resistance measures high and out of limits, simply connect the RP-1501 CPC to the errant loop and turning it on for one minute.

When the loop is tested again, if there was oxidation on the connectors, the loop resistance will now be within limits.

### Device Specifications:

Model Number	RP-1501
Part Number	99001501
Output Connector	BNC
Battery	1 x 9V
Exterior Dimensions	5.67"x3.35"x1.89"   144x85x48mm
Weight	0.71Lbs   323gr
Protection Class	IP40
External	Plastic case with shockproof silicone cover
Material	Flame-Resistant ABS UL94V-0
Operation Indication	Normal (Green LED) - Low Battery (Red LED)
